Education

2026 (Reading) MSc in (Computer Science) Cyber Security
Staffordshire University, UK

2023 B.Sc. (Hons) in Computer Networks
First Class Honors, **University of Wolverhampton**, UK

2021 HND in Computing and Network Technology
ICBT Colombo Campus, Sri Lanka

2020 Diploma in Information Technology
ICBT Colombo Campus, Sri Lanka

Work Experience

Dec 2023 – Dec 2025 | **IT Systems Analyst**
PMsquare Asia (Pvt) Ltd

- Developed and revised organizational IT procedures and identified areas requiring new policies and processes for how employees interacted with IT systems and services.
- Supported the everyday use and maintenance of organizational digital infrastructure across the APAC region, working with both technical and non-technical users in a Microsoft 365 cloud environment.
- Managed user access, permissions, onboarding, offboarding, licensing, and device provisioning using Microsoft 365, Azure Active Directory, and Intune, translating organizational requirements into practical system-access procedures.
- Managed incidents and service requests and coordinated with users, internal IT teams, vendors, and other stakeholders to resolve technical and organizational issues affecting IT services.
- Contributed to infrastructure and process improvements by documenting operational practices, maintaining IT records, and identifying recurring issues in existing support procedures.
- Trained new IT team members and conducted knowledge-transfer sessions, helping standardize how IT procedures and organizational practices were communicated and implemented.

Jun 2023 – Dec 2023 | **Junior IT Systems Analyst**
PMsquare Asia (Pvt) Ltd

- Provided L1 remote IT support to end users for hardware and software issues, troubleshooted and escalated issues to L2 systems support engineers and/or suppliers for on-site support.
- Analyzed and resolved support tickets or alerts from automated monitoring systems within the time frames of organizational level agreements (OLAs)/service level agreements (SLAs).
- Supported IT operational tasks, liaised with internal L2 system support engineers to coordinate with vendors and suppliers, and administrated internal IT application systems, servers, LAN and cloud infrastructure.
- Worked with internal L2 system support engineers to implement process improvements and solutions, troubleshooted endpoint devices, including cloud systems.
- Worked with internal L2 systems support engineers to administrate end user and endpoint devices, including user and group management, provisioning, enrollment, installation and application of device and application security profiles, device data backup, and incident resolution.

Sep 2021 – Mar 2022

Service Delivery Intern
Pearson Lanka (Pvt) Ltd

Supported the delivery and maintenance of organizational IT services, including the coordination of service disruptions, incident response, and restoration within agreed service-level requirements.

Participated in IT change-management processes by evaluating and supporting change requests affecting servers, networks, workstations, and other organizational systems.

Worked with users and international technical teams to troubleshoot hardware and software problems and coordinate service requests through calls, email, and virtual meetings.

Assisted with KPI reporting and operational documentation while working within ITIL and Agile processes, gaining experience with the organizational procedures through which technical infrastructure is managed.

Research and Projects

2022 June

Adaptive Academic Guidance System Via Student Activity/Performance Analysis and Profiling
Final Year Project (Individual Project)

- Planned, designed, and implemented an adaptive e-learning system.
- Implemented an adaptive algorithm and planned and implemented the database structure in SQL.
- Stored the database in Cloud Firestore, implemented the algorithm in PHP, and hosted the adaptive e-learning system on the web.

2022 Nov

Comprehensive Company Network

- Served as team lead and cabled and configured the network using static routing.
- Configured secure router administrative access using encrypted passwords, logging banners, EXEC timeout, and SSH.
- Configured a zone-based policy firewall and IDS on critical servers.

2022 Jan

Database Management System for E-Commerce Platform

- Designed the ERD of the system using Oracle Data Modeler.
- Implemented the database system using Oracle.

Community Engagement & Entrepreneurship

2018–Present Founder & Owner – Online Canvas Art Business
Established and managed an independent art business, combining artistic creativity with online business operations and customer engagement.

2026 Organized annual donation programs for underserved rural schools in Sri Lanka. Donated laptops and conducted educational seminars to improve children's digital literacy and awareness of safe technology practices.

2020 Participated in the "Helping Hands Program," supporting children at an orphanage in Sri Lanka.

2020 Organized a food donation program for patients at a cancer hospital in Sri Lanka.

Certifications

2026: Azure 104 (Reading) 2020: SQL Course–SoloLearn 2020: Python Core–SoloLearn

Technical Skills

Programming & Data	SQL, C++, PHP, HTML
Networking & Security	Routing & Switching, VPNs, Firewalls, Network Security, Wireshark
Cloud & Systems	Microsoft 365, Azure, AWS, Windows Environments, Azure Active Directory, Intune, Exchange Online
IT Service Management	ServiceNow, Jira, Microsoft Defender
